

Swd Rheinol Silvacur K100

Special Adhesive Oil for Chain Saws

Description and Properties

Swd Rheinol Silvacur K100 - is an adhesive oil for chain saws made on the base of mineral oil. It provides high lubricating film stability and excellent protection against corrosion.

Swd Rheinol Silvacur K100 - is specially concerted to the practically existing requirements for the lubrication of motor-driven chain saws. These requirements are

- good adhesive power by special tackiness additives which prevents dripping off and throwing off from the rotating chain saw.
- outstanding lubrication properties by high lubricating film stability which reduces wear on the chain links and on the guide rails.
- good fluidity, even at low temperatures
- high aging stability which prevents gumming or thickening in case of longer downtimes.
- excellent corrosion protection even at weather-caused effects.

Application

Swd Rheinol Silvacur K100 - is used for the lubrication of motor chain saws.

Other ranges of application are lubrication areas of low loading, if an adhesive oil is needed.

If there is a risk of impairment by environmental pollution due to the loss-lubrication, mineral chain saw oil may not be used. For such cases we recommend to use our biodegradable chain saw oils

Swd Rheinol Silvacur BIO.

Typical Values

Swd Rheinol Silvacur K100	unit	value	method
Density at 15°C	kg/m ³	890	DIN 51 757
Kinematic viscosity at 40°C	mm ² /s	103	DIN 51 562
Pour point	°C	< -30	DIN ISO 3016
Flash point	°C	205	DIN ISO 2592
Article-No. :		36242	

Specification variations in these characteristics may occur.
The instructions of manufacturer must be regarded.
